Particulate and Coalescing Filter Elements

TTI Fuel Elements provide the absolute best filtration media available. Better media produces better filters, and better filters produce better fuel.

We guarantee users lower than ISO 11/08/07 fuel cleanliness.

Fuel Cleanliness Solutions

TTHH-207 and TTTH-107 High Capacity Housings

Without expert filtration solutions, equipment and systems can degrade quickly, causing unexpected downtime and costly repairs.

Give your equipment the best filtration protection possible with TTI's fuel filtration solutions. Our 304 Stainless Steel High Capacity Housings are rated up to 180 GPM and are durable enough for all of your applications.

304 Stainless Steel High Capacity Housings
